THE FUTURE OF CRYPTO INVESTMENT

We believe that digital currencies will revolutionize our legacy economic, political, and social systems. With that transformation comes a meaningful generational shift in how institutions and individuals approach investing.

That's where **iVi CRYPTO INTELLIG3NCE** comes in.

INTRODUCTION

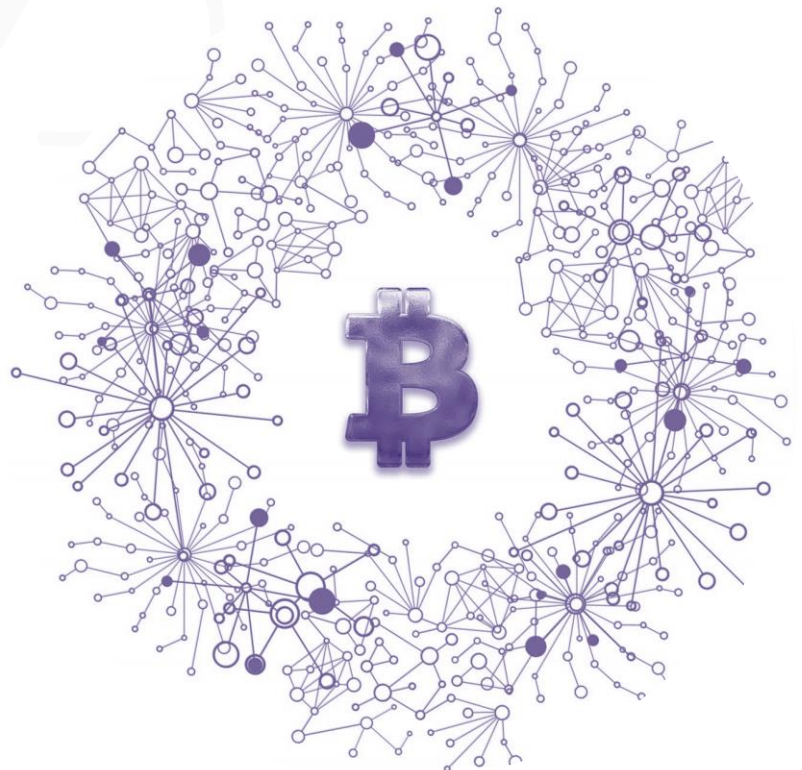

INVESTMENT OBJECTIVE AND APPROACH

iVi Crypto Fund (the “Fund”) is an investment vehicle that enables investors to gain access and exposure to the 50th biggest digital currencies in market cap in the form of a security without the challenges of buying, storing, and safekeeping digital currencies directly. The Fund’s shares are among the first securities solely invested in, and deriving value from, a basket of digital currencies.

ABOUT IVI CRYPTO INTELLIG3NCE

iVi Crypto Intelligence (“iVi Crypto”) is a Trust Company based in South Dakota, USA, with leading trading technology built by scientist researchers with over 15 years of experience, PhD in applied mathematics in the quant fund market coupled with a team with over 10 years’ experience in the Capital and Cryptocurrencies Markets.

With a proven track record and unrivaled experience, iVi Crypto provides access to digital currency products that operate within existing regulatory frameworks, creating secure and compliant exposure for investors.

BEST RETURNS

- Results that constantly outperform the benchmark (BTC), as well as the S&P Cryptocurrency Broad Digital Market Index

CORPORATE GOVERNANCE

- Most sophisticated processes and controls
- Robust corporate governance structure

BEST-IN-CLASS TEAM

- We have the best-in-class team from all areas (Crypto, Capital Markets, Technology and platforms, Artificial Intelligence and Machine learning)

WHY INVEST IN IVI CRYPTO FUND?

BEST TECHNOLOGY IN ALGORITHMIC TRADING

Our proprietary trading technology supports the deployment of investment capital. Since our strategies are fully systematic, we developed most of our investment technology in-house in order to have control over execution quality and satisfy the requirements imposed by our trading algorithms.

In order to support our quantitative research process, our quantitative developers have developed internally automated tools that help our quantitative research team in the identification of new sources of alpha in big amounts of data in an effective and efficient way.

SUPPORTED BY NETWORK OF TRUSTED, BEST-IN-CLASS SERVICE PROVIDERS

Saint Joseph Trust Company serves as our Trustee and as legal counsel to the Directors of iVi Crypto Fund, and NAV Fund Administrators provides administration and accounting services.

ROBUST SECURITY AND STORAGE

The Fund's constituents are stored in offline or "cold" storage with Bitgo and Finoa, a qualified custodians for purposes of Rule 206(4)-2(d)(6) under the Investment Advisers Act of 1940.

MAJOR BENEFICIARIES

Potential clients for our quantitative Crypto fund includes individual investors (Non-US), High Net Worth Individual's ("HNWI") who want to achieve an active exposure to the crypto market, investors who already own cryptocurrencies and want to capture both up and down markets, family offices, and institutional investors.

In particular, HNWI's usually do not have the time and resources to perform financial research and constantly monitor their investments, so it is preferable for them to delegate the management of their capital to investment professionals. Family offices can invest in the strategy in an optic of portfolio diversification to benefit from investing in an investment product with performance uncorrelated to their current holdings. Lastly, institutional investors can allocate to a quantitative low-frequency crypto investment product in a core-satellite approach to achieve exposure to the cryptocurrency market through an actively managed investment product.

**Crypto
Revolution is
Unstoppable**

INVESTMENT OBJECTIVE

The goal of the investment strategy is to deliver alpha by actively trading in a basket of cryptocurrencies.

PORTFOLIO DIVERSIFICATION

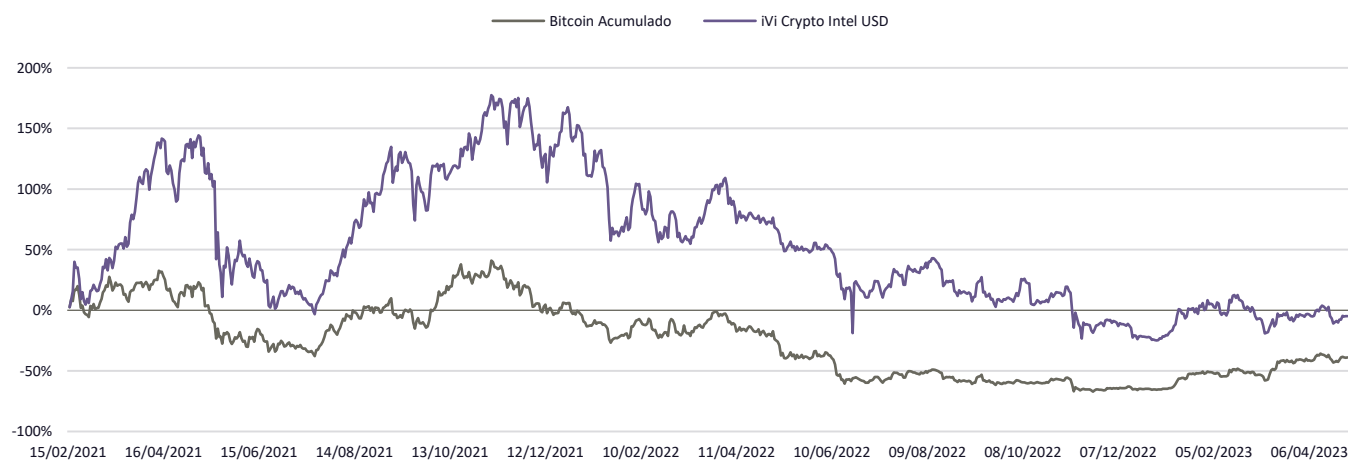

Our fund invest capital in a basket of partially correlated cryptocurrencies, achieving partial portfolio diversification compared to a pure investment in Bitcoin.

INVESTMENT HORIZON

The strategy aims at capturing alpha sources embedded in short to medium term horizon due to the high volatility present in cryptocurrencies.
